

Pest and Vermin Control

Most local authorities offer a pest control service to businesses and residents. Pest control can generate significant revenue and be a valued long-term service.

Collective has all you need to manage your pest control operations so you can win more business, work more effectively and provide better customer service.

Key Features

Integration with all major web platforms, including Jadu, Goss and FirmStep for online bookings and appointments.

Automated workflows assign requests to the most appropriate operators.

Dynamic workpacks for each operator with navigation and messaging functions.

Operators record treatments and book follow-ups as required.

Text and photographic records of treatment and trap locations.

Options for one-off, call-off and scheduled treatments.

Product Benefits

Win more business with a one-stop online booking and payment system giving confirmed appointments and fixed-price services.

Increase productivity with a mobile, paper-free operation that lets crews work faster and more flexibly.

Win long-term contracts with flexible call-off services and professional reporting and documentation your customers will love.

Produce professional, costed quotes on-site with flexible price lists, then monitor conversion rates.

Automate invoicing and credit control with integration to your finance and payments systems.
